

Professional Summary

Technology Leader with 20+ years of experience delivering enterprise-scale engineering, SRE, cloud modernization, data platforms, test automation, and GenAI transformation across BFSI, FinTech, Telecom, and Global Enterprises. Proven ability to lead large cross-functional teams (500+ engineers), govern multi-vendor portfolios (2500+ staff), and execute programs worth 50M–150M AUD.

Expert in Cloud Architecture (Azure/AWS/GCP), SRE & Reliability Engineering, DataOps, Java/Spring microservices, Test Automation, DevOps, and GenAI (Llama, Bedrock, SageMaker). Recognized for driving tech-debt remediation, application decommissioning, regulatory compliance (APRA/SOX/GDPR), operational resilience, and AI-driven automation. A strategic leader blending architecture depth, delivery governance, and hands-on engineering to build scalable, secure, and high-availability platforms.

Achievements: Reduced MTTR by 45% using AIOps + GenAI automation, delivered 80% IaC target with Ansible, migrated 150+ apps to cloud-native platforms and Built enterprise automation frameworks used by 50+ teams. Worked on data strategic redesign of data architecture, governance, and operations that directly reduce costs and increase efficiency. (data migration to open source & cloud databases, adapting cloud data warehouses and effective data processing costs management for snowflake, databricks, ETL pipeline

Core Competencies

- **Cloud, DevOps & SRE:** Azure, AWS, GCP, AKS, EKS, Terraform, Ansible, Helm, Docker, K8s, IaC, Zero Trust, RBAC, NT
- **Observability & Business Continuity:** Grafana, Splunk, Dynatrace, New Relic, Major Incident Management, DR/BCP, FinOps
- **Data Engineering & DataOps:** Snowflake, Databricks, AWS Glue, Delta Lake, Airflow, Databricks Workflows, ETL/ELT pipelines, Data Quality (Monte Carlo, Great Expectations), High-availability data architectures (Aurora Global DB)
- **Java, Microservices & Automation:** Java 17, Spring Boot, Spring Batch, REST APIs, Kafka, API Gateway, distributed systems, Selenium, Playwright, REST Assured, Cypress, JMeter, LoadRunner, K6 (Performance Engineering)
- **Quality Engineering & Test Leadership:** Enterprise QE governance (SIT/UAT/NFT/Regression), Shift-Left/Shift-Right, RTM, coverage analytics, CI/CD-integrated automation (Azure DevOps, Jenkins, GHA), QE maturity uplift, TCoE setup, vendor governance
- **GenAI & Automation:** Llama models, AWS Bedrock, SageMaker, Automation Builder GPT, QE Analyzer GPT, RAG pipelines, NLP→SQL, AI-assisted debugging, AI-driven documentation, test case generation
- **Program, Portfolio & Vendor Governance:** Managed 50M–150M AUD portfolios, Governed 2500+ vendor staff across 5 partners, APRA CPS 230/231, SOX, GDPR, PCI DSS and SLA governance, contract compliance, risk management

Professional Experience

Tech Freelancer Feb 2026 – Till Date,

Role: Cloud, DevOps and Data Technology specialist and trainer

- **Azure DevOps** Trainings and Projects delivered for UST Global in February 2026
- **AWS Bootcamp** conducted for Flex Chennai experienced engineers, February 2026
- **IBM Data Engineering 1 Month training** in Python, SQL, Snowflake, Databricks, Spark and BigData

ANZ | Technology Vice President Jun 2018 – Feb 2026

Role: Lead – Engineering, QA & Data

- Cloud, SRE & Reliability Engineering:
 - Led SRE transformation using AIOps + GenAI, reducing MTTR through automated log analysis, predictive alerts, and self-healing workflows.
 - Implemented IaC using Terraform/Ansible, codifying production environments across hybrid cloud.
 - Directed observability uplift using ITSI, Dynatrace, Grafana, enabling adaptive incident reporting and automated remediation.
 - Managed \$150M+ AUD CTB/RTB portfolio with FinOps-driven cloud optimization.

- **Data Engineering & DataOps**
 - Built automated pipelines using Databricks + Delta Lake + AWS Glue, reducing storage cost and improving data integrity. Designed Snowflake ingestion using Snow pipe, SQS/SNS, and event-driven ETL.
 - Reduced DR timelines from hours to seconds using Aurora Multi-AZ + Global Database.
- **Java, Microservices & Automation:**
 - Modernized Java estates to Java 17, implemented Spring Boot microservices, Kafka-based event flows, and secure API governance.
 - Built enterprise automation frameworks using Playwright, Selenium, REST Assured, integrated into CI/CD.
- **GenAI Product Leadership:** Designed and delivered GenAI accelerators: Portfolio Chat (SageMaker + Bedrock), - Requirements Coach LLM, Automation Builder GPT, QE Analyzer GPT and Enabled AI-driven code generation, debugging, documentation, and test creation.
- **Program & Vendor Governance:** Functioned as Tribe Head for vendor delivery, governing 2500+ staff across 5 strategic partners. Led operational stability, DR/BCP, vulnerability management, and TPRM assessments (SIG, SOC2 Type II).

ANZ | Performance Manager (Testing Services), May 2015 – May 2018

Role: Senior Engineering Manager – Java, Cloud & Automation

- Led QE delivery across 50+ BFSI groups, improving productivity and cycle time through automation.
- Defined TDM roadmap for masking, Subsetting, and compliance across SQL/Oracle/Mainframe.
- Built enterprise dashboards for quality, productivity, and defect prevention.

ANZ | Quality Consultant, July 2010 – Apr 2015

Role: Technical Lead – Java & Enterprise Platforms

- Established distributed QE function across 50+ delivery groups.
- Conducted delivery audits, release governance, and risk-based testing.
- Awarded CEO Performer (2012) for excellence in governance.

Earlier Roles (2004 – 2010)

ITC Infotech | Capgemini | Datamatics | Rolta

- Led core banking migration (Sampo → Danske) ensuring zero data loss.
- Managed ITIL/ISMS compliance, SLM, and BFSI AMS delivery.
- Delivered GIS & imaging systems for Defence, Utilities, Smart Cities

Projects Summary:

1. **Data Engineering:** Databricks + Delta Lake deduplication pipeline, AWS Glue ETL automation, CloudWatch anomaly detection and Snowflake ingestion via Snow pipe. proficient in Data Modeling, CDC, Data Lineage and Data Catalog
2. **GenAI Engineering:** Llama-based models for code generation, debugging, documentation, RAG demo for enterprise knowledge retrieval and AI-driven SQL optimization, DevOps config generation
3. **SRE & Observability Uplift:** Predictive incident detection, Automated rollback (Jenkins), pod restart (K8s API), SOAR integration, MTTR reduction through AIOps defined and managed SLO/SLA/Error Budgets, streamlined Chaos Engineering. conducted Root Cause Analysis (RCA) sessions to derive preventive actions to SRE, DevOps, Platform, Dev teams and monitored ASHII (Asset Health Index / Asset Health Scorecards)
4. **Cloud Modernization & AKS Platform:** AKS cluster engineering (RBAC, node pools, network policies), GitOps deployment workflows, Zero Trust, private endpoints, VNet design. Architected Azure Landing Zones, Cloud Governance Framework and Cost Optimization (FinOps)
5. **Tech Debt & Decommissioning:** Legacy retirement, infra cleanup, RBAC offboarding, Data archival, secure destruction, DR/BCP alignment

Education & Certifications : **Master of Technology (M.Tech)** – Remote Sensing & GIS in 2003 from NIT Warangal , Cloud &SSBB
